San Francisco-based CNET ChannelServices (CCS), a business unit of CNET Networks, Inc. (CNET), Nov. 7 announced a partnership with Fremont, CA-based SYNNEX Information Technologies, Inc., an information technology product distributor. CNET ChannelServices' technology product information solution, DataSource, will power SYNNEX's technology buying Web site, ECExpress. DataSource, a flagship product of CNET ChannelServices, is a multi-lingual database that provides computer product descriptions, images, and specifications for one million technology product SKUs worldwide. By integrating DataSource into its sites serving customers throughout the United States and Canada, SYNNEX will provide comprehensive, up- to-date product data, allowing faster and easier access to essential purchasing information, and the ability to create product comparison charts that aid the decision making process.
